Art Unit: 1644

DETAILED ACTION

1. Applicant's amendment, filed 08/21/03 is acknowledged.

Claims 1-4, 6-8, 11-19 and 50-54 are pending.

Species Election

2. Applicant is required under 35 USC 121 (1) to elect a single disclosed species to which the claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

3. Applicant is required to elect a specific method of activating T lymphocytes, comprising **one specific type of T cell activation**, such as proliferation or production of cytokines or undergo apoptosis, as recited in claims 15-19.

4. Applicant is further required to indicate aggregation of which specific combination of antigens, recited in claim 4, correlates with elected **specific type of T cell activation**.

These species are distinct because each specific type of T cell activation differ with respect to the specific combination of antigens involved and mechanisms of activation ; thus each specific method represents patentably distinct subject matter. The examination of species would require different searches in the scientific literature.

5. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Art Unit: 1644

Should applicant traverse on the ground that **the species are not patentably distinct**, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. A telephone call was made to Julie Urvater on 11/26/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michail Belyavskiy whose telephone number is 571/ 272-0840.
